RE: Letter of Recommendation

To Whom It May Concern:

I would like to take this opportunity to commend Metalforce Inc. for the outstanding and professional manner in which they have always met our requirements. Metalforce has performed at the highest level in every aspect of the work they have performed.

For the past four years, Metalforce has designed and manufactured more than one thousand complete armor kits for International Armoring. The design and fabrication of these kits has required daily communication with multiple staff members. Armor kit designs have included all types of SUV's and sedans. Metalforce has also acted as a subcontractor and installed armor kits when demand was higher than IAC could supply.

During the time Metalforce and IAC have been in collaboration, Metalforce has displayed complete professionalism. They have given unparalleled attention to detail and have exhibited a "can do" attitude that is rarely seen in today's business environment. Their product quality has always been of the highest caliber, which has had a direct effect on our customer satisfaction.

Our relationship with Metalforce has been the key to our expansion into other markets and opportunities both state side and abroad. Metalforce and IAC have current projects that will expand our relationship even further which will continue for years to come.

We are pleased to be able to give our most sincere recommendations to Metalforce Inc.

Sincerely,

Kirk F. Matheson

Mr. Tony Thurber & the Metalforce Team

2/13/2007

I would like to take a moment to say thanks for all of your help on the E.D.O. Staves Project. The customer has been in and inspected the last of the Staves and approved them for shipment. This job started out tough and proved to be a trial throughout the whole project.

The joint effort of Petersen Inc., and Metalforce proved to be outstanding in the field of fabrication, and a large Thanks goes out to all that were involved.

I personally want to say Thanks again for you sticking with this project and for your help keeping the project cost as low as possible.

Steve Wardleigh
